8252951187 | aec.ece.zeenatara.2027.082@gmail.com | github.com/Zeenatara | linkedin.com/in/zeenat-ara-a1a192381

Career Objective

Results-driven Electronics and Communication Engineering undergraduate with demonstrated expertise in full-stack software development using the MERN stack, REST API design, and cloud deployment. Seeking a Software Engineer / System Engineer role at Tata Consultancy Services (TCS) to contribute to enterprise-grade application development and the Software Development Life Cycle (SDLC), while growing within TCS's structured learning and mentorship ecosystem.

Technical Skills

Languages	Java (OOP, Data Structures), JavaScript (ES6+)
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Responsive & Mobile-First Design
Backend	Node.js, Express.js, REST API Design, MVC Architecture
Database	MongoDB, NoSQL schema design
Real-Time	Socket.IO, WebSocket, bi-directional event-driven communication
Cloud & DevOps	Git, GitHub, Vercel (CI/CD), Oracle Cloud Infrastructure (OCI)
Security	JWT Authentication, Hashed Credentials, Secure API Route Protection
Core Concepts	SDLC, Agile Methodology, Object-Oriented Programming, Computer Networks, Operating Systems, Problem Solving, Debugging, Code Review

Projects

Real-Time Messaging Application | *MERN Stack, Socket.IO, JWT*

2025

<https://realtime-chat-app-hefa.vercel.app/>

- Developed a full-stack real-time chat application using React.js, Node.js, Express.js, MongoDB, and Socket.IO.
- Implemented JWT-based authentication and real-time messaging functionality.
- Built responsive UI components using Tailwind CSS and integrated REST APIs with MongoDB database management.
- Deployed the application on Vercel following full-stack development practices.

Nivaran – Doctor Appointment System | *MERN Stack, JWT*

2025

- Developed a full-stack doctor appointment system using React.js, Node.js, Express.js, and MongoDB.
- Implemented appointment booking functionality, JWT-based authentication, and REST API integration.
- Built responsive UI components and integrated backend services with MongoDB database management.
- Structured the application using MERN Stack architecture following full-stack development practices.

Education

Asansol Engineering College

2023 – 2027 (Expected)

B.Tech in Electronics and Communication Engineering

CGPA: 7.2 (till date)

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java), Operating Systems.

Certifications

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

Oracle, 2025

Software Engineering Job Simulation

JP Morgan Chase via Forage, 2025

Solutions Architecture Job Simulation

Amazon Web Services (AWS) via Forage, 2025

Achievements & Activities

- Developed and deployed full-stack MERN projects with frontend, backend, database, and REST API integration.
- Completed JP Morgan Chase and AWS virtual job simulations related to software engineering and cloud concepts.
- Practicing Data Structures and Algorithms using Java and actively exploring full-stack web development.

Interests

Full-Stack Web Development · Real-Time Application Design · Cloud Computing (OCI, AWS) · Open Source Contribution
· Frontend UI/UX Engineering
